

Personal Constellation

Name _____ HR _____ Date _____

What does your name look like as a constellation?

Directions:

1. Write your name vertically down the Y axis. (Skipping a space between each letter of the name will spread the picture out better.)
2. Start with the first letter in the written name. Follow along that row parallel to the X axis until you come to the column with that letter of the alphabet and draw a star in that square (see example). Continue with the other letters.
3. Look at the stars and find a pattern. The paper may be held in any orientation, and one or several constellations could be created.
4. “Connect-the-dots” and draw a picture of your constellation.

Personal Constellation

A large grid of 26 columns and 26 rows, labeled with the letters A through Z along the top edge. The grid is composed of thin black lines forming a continuous pattern of small squares. The letters are in a bold, sans-serif font.
